YOUR (DOG LOVING) REAL ESTATE NEWSLETTER

Wishing you a joyful June

June in Georgia means one thing, heat is coming, and fast. For bulldog owners, you already know the window for comfortable outdoor time is closing.

Before the humidity takes over, here are 3 ways to keep your home cool, your bulldog safe, and your property value strong all summer long:

1

Know Your dog's Heat Limits: Every dog handles heat differently, but no dog thrives in Georgia summer temperatures. Limit outdoor time to early morning or after sunset, always provide fresh cool water and shade, and watch for heavy panting, drooling, or lethargy, signs your pup needs to come inside immediately.

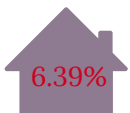

2

Upgrade Your Home's Cooling System: A well-maintained HVAC isn't just comfort, it's a selling point. Smart thermostats, energy-efficient systems, and whole-house dehumidifiers are among the top features Atlanta buyers are searching for right now. If your system is over 10 years old, summer is the perfect time to evaluate an upgrade.

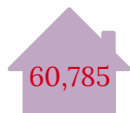

3

Create a Shaded Outdoor Retreat: A pergola, shade sail, or covered patio extends your outdoor living season, for you and your pup. Shaded outdoor spaces consistently rank among the top backyard upgrades for both livability and resale value in the Atlanta market.
